

MULTI-POCKET MODELS

THE BRAND NEW
GUK-14 POCKET FOLDING MACHINE,
FOLDING UNLIMITED

BROAD, FAST AND ACCURATE
WITH 14 FOLDINGS IN ONE
STATION - NEARLY UNBEATABLE

The advantages of the 53 models
and the good experience in miniature
folding in combination with the
VARIABLE models make this new
machine one of its best. Folding
precision with light pharmaceutical
papers with a max. broad of 530 mm.

The highly stabil and solid
construction in connection with
a round pile feeder provides the
highest productivity in its class.

INTERMEDIATE DRIVE

FA 53/14

TECHNOLOGY

The low-noise and low-wear belt
drive outside the paper track gives
the rollers a very smooth run.

Short set-up time through quick and
easy roller adjustment and the optional
electronical pre-setup of the folding
pockets.

GUK-OUTSERT-SYSTEM

MV 08 SYSTEM

SPECIAL MACHINE FOR
OUTSERT-PRODUCTION WITH
ALL AROUND CLOSED EDGES

For producing the patented VIJUK
RTA-Outserts with up to 90 panels on
a sheet and a folded trimmed size of
just 35 x 35 mm as a package insert
with lots of information. (license
required)

In combination with the models
FA 43/FA 45/FA 53 pocket folding
machines you can process formats
with up to 430/530 mm width and
1414 mm length.

TECHNOLOGY

Special combination of the fast
flat pile FL-2 feeder and the reliable
FA 43 /10 folding machine and
a special equipped FA 35/4 VARIABLE.

The produced outserts are later
cut and folded by the VIJUK parallel
knife folding mechanism MV 97
so that in the end there are
NO open edges.

MV 2001 & MV 2005

VIJUK OUTSERT-SYSTEM
WITH GUK-VARIABLE FOLDING-MACHINE

FA 53/14-4 R6 MV 2005

FA 43/8-4 R6 MV 2001

SPECIAL MACHINE FOR
OUTSERT-PRODUCTION WITH
ALL AROUND CLOSED EDGES

For producing the patented
VIJUK RTA-Outserts with more than
90 pages on a sheet and a folded
trimmed size of just 35 x 35 mm
as a package insert with lots of
information. (subject to licence)

In combination with the new FA
53/14 pocket folding machine you
can produce formats with up to
530 mm width and 1414 mm length.

TECHNOLOGY

In a special combination with a
round pile feeder you are able to
produce continuously. Combined
with the approved miniature folding
machine and special equipped station 2
VARIABLE machine you get best fol-
ding results.

Then the folded sheet is again
folded, closed and finished by two
parallel knife folding machines typ
MV 2001 so that there are NO open
edges.

MV 2001

FA 43/8-4 R6 MV 2001 System
with one knife folding mechanism
(parallel knife) for endprocessing
of VIJUK RTA-Outserts.
