

# Ink Mixers

BUSCH Ink Mixers  
for the quick  
preparation  
of special mixes

Quick and thorough mixing is achieved by the up-and-down motion of the mixing arm, and the simultaneous rotation of the ink container. No bubbles, no lumps.

## FM 20

## FM 12

## FM 5

Well-ried and robust ink mixers for both printers and ink manufacturers.

For the quick and intensive mixing of printing ink.

---

A suggestion for our customers, who are often mixing several colours:

Additional containers and mixing arms can be ordered, avoiding cleaning after every mixing, and leaving the unit free for the next task.

The ink containers for models FM 12 and FM 20 are made of a special cast aluminium, polished inside.

The ink containers for model FM 5 are made of highgrade stainless steel.

**Ink Mixers**

**Robust,  
quick,  
convenient.**

**FM 5** Table top model
