- without engagement -
August 2008

The pile turner is equipped for 3 working cycles, selectable at the control desk:

- Turning the paper / board pile
- Airing, aligning and jogging the pile
- Airing, aligning, jogging and turning the pile

Adjustable and programmable airing parameters:

- Measure of platform opening in airing position
- Number of air jet travels between the platforms
- Air volume
- Speed of air jets
- Jogging intensity
- Holding or compressing the pile

Equipment:

- Powerful airing
- Pressure control flaps
- Aligning gauge with automatic-pneumatic pile height adaptation
- Jogging
- Control desk – slewable to the front and rear side of the pile turner
- Regulation of air volume at the control desk
- Adjustment for ‚holding the pile’ or ‚compressing the pile’
- Touch-screen-display for operation and programming incl. program memory for repeat jobs and indication of error messages

Options:

- Ionised air (only for SWH-SA 125)
- Enlarged opening height for higher piles up to 1750 mm (SWH-SA 125)
- Enlarged opening height for higher piles up to 2000 mm (SWH-SA 155 and SWH-SA 180)
- Catwalk at the rear side of the machine
