## Multiple Banding Machines MB 54, MB 74 and MB 104

$\square$ Inline banding of rows of paper piles
$\square$ Integrable in each cutting plant

- Applicable for mixed sheets (patented machine system)
- Integrated feed pusher
$\square$ Increased output of the cutting plant by more effective work flow and handling of cut paper piles
ㅁ 1-2 minutes set-up time for size adjustment without tools
$\square$ Productivity by saving of labour
- Banding widths of 54,74 and 104 cm
[ Available for delivery to the left or right side (side-inverted construction)

## Equipment

- Integrated clear text display:
- Operating status
- Operator call
- Error messages
- Adding counter
- Programmable sealing and cooling times
- Adjustable operating language

- 4-6 Banding stations (as an option up to 12 stations) with central adjustment
- Banding material LDPE-foil or kraft paper tape
- Roller delivery with height adjustment for easy unloading

The Multiple Banding Machine serves for banding paper piles, square-cut on a guillotine.

> feeding size

banded piles

Due to its special design the Multiple Banding Machine bands paper piles with differing lengths and widths, e.g. from mixed sheets.
feeding size
banded piles

## Examples of installation

 with delivery to the left or right side

Installation as stand-alonemachine (e.g. with air pallet lift) or directly linked to all known cutting systems, electric and pneumatic connection is not necessary!
Height of table plate adjustable to $900+/-20 \mathrm{~mm}$ !

## Models

for delivery to the left or right side
